"...Released as an alternative to the many mainstream Christmas releases, the new track by Alexander Ross-Iver is an electronic-pop track which, rather than focussing on the joy of the festive period, re-imagines it as a chance to push the reset button on a difficult year. In a message which I'm sure will resonate with many, it tells the story of having a bad year, but using Christmas and New Year as a chance to 'start again'.

Available now on iTunes, it's got a smooth, upbeat feel that carries the momentum throughout. The simplistic vocal delivery is worth a mention too, it's unfussy, melodic and very understated.

So if you're tired of the same old Christmas tunes that are trotted out each year, check out Alexander Ross Iver's refreshing alternative."
